

Project Title: Living coffin

Hosted By: Studio Hendrixx x Loop Biotech

Project Introduction:

What if your everyday objects become alive?

About Organisation:

Studio Hendrixx is a design studio led by Biodesigner Bob Hendrixx. They turn science fiction into reality by exploring a living world. A world in which we no longer work with dead materials, but with living organisms.

Loop Biotech is on a mission to restore nature. They do this by bringing human nutrients back into the cycle- of- life in the most natural way with a living mycelium-based coffin that enables people to enrich the soil and allow new seedlings to thrive. From graveyard to forest.
