

# Project Title: Pots Plus

**Hosted By: The New Raw**

## ***Project Introduction:***

The Pots Plus collection explores the possibility of using the city's plastic waste in order to build bespoke furniture with robotic 3D printing.

## ***About Organisation:***

The New Raw is a Research & Design studio based in Rotterdam (NL), founded in 2015 by the architects Panos Sakkas and Foteini Setaki.

The studio uses robotic 3D printing with recycled plastic to develop and implement circular design concepts of high aesthetic value and societal impact. The bigger vision behind each of our projects or products is to contribute to a closed material cycle for plastic, raise public awareness and stimulate local production.
