

# Project Title: reCharkha EcoSocial Upcycled Handwoven Products Collection

**Hosted By: reCharkha EcoSocial**

## ***Project Introduction:***

We UPCYCLE waste plastic such as polybags/plastic bags, biscuit or wafer wrappers and other multilayered packaging, using a traditional CHARKHA (Spindle) and HANDLOOM to weave it into a fabric. This unique process is designed to provide LIVELIHOOD opportunities for our VILLAGE WOMEN and YOUTH.

## ***About Organisation:***

reCharkha EcoSocial is a Social Enterprise, founded on the belief that, development can only be sustainable if it is bottom-up! This means, sustainable development is possible only when it begins at the grassroots and involves an empathetic understanding of the other biotic and abiotic communities.

Our three core areas of work are geared to achieve this very model!

These are:

- 1) Conserving our Environment and Heritage,
- 2) Enabling Rural Livelihoods and
- 3) Creating Conscious Consumers
