

Project Title: The Interactive Textile Library

Hosted By:

Project Introduction:

The Interactive Textile Library is an online and offline library that aims to provide insight to the most interesting interactive textile developments and to connect people so that together we can innovate the industry.

About Organisation:

The Interactive Textile Library (ITL) was founded by Julia van Zilt in 2021. ITL is an online platform that aims to present a platform for companies that produce interactive textiles (or the techniques to produce them) and designers that work with them. The goal is to connect different businesses and designers to stimulate the commercial integration and development of these novel types of textiles, bringing its benefits closer to the eventual consumer.
