

Project Title: Symbiosis: Willows and Cattails

Hosted By: Studio of textile design / UMPRUM Prague

Project Introduction:

The Symbiosis project aims to inspire creativity in using material easily found by local ponds and brooks. Also, it raises awareness about forgotten craft techniques and about changes in the ecosystem of water in the Czech landscape.

About Organisation:

The studio of textile design at the Academy of Art, Architecture and Design in Prague explores textile design in all its forms. For their creations, the young designers use not only modern technologies and approaches, but also look for new materials and processing methods. In addition to perceiving the properties of the materials used, the students also study their relationship with nature, sustainability, and ecology.
