

Project Title: Building Dialogue

Hosted By: "Building Dialogue" DAE Social Designers students

Project Introduction:

"Building Dialogue" is a collective role game in which players immerse themselves in a provocative scenario and are guided to question the status quo of today's world. The aim is to offer the participants of the DDW22 a space of reflection and practical action to tackle a given situation as a team.

About Organisation:

"Building Dialogue" is formed by a multidisciplinary group of designers representing 11 different nationalities. As a team of diverse disciplines, visions, and talents, we found our common ground in "designing the Social" by questioning how we can imagine different futures and scenarios using our collective assets. We believe in forms of collectivity, active participation, and constructive listening, to question and shape future realities concerning social and ecological challenges.
