

Project Title: Reos

Hosted By: Adam Friedrich + Beata Mielus

Project Introduction:

Reos project is focused on industrial and household waste. Food industry generates a lot of waste which is often not reused and later disposed. In Reos we reuse byproduct from meat industry – bones, to create new solid biomaterial, which can be formed into various objects. In this case, a seating.

About Organisation:

Friedrich + Mielus is an industrial design duo from Gdansk. In their work they are focused on the functionality, simplicity and sustainability of the products. Very important aspect of their approach to design is concentration on materials and production process, which plays big role in creating object in the responsible way. In their recent projects, they have experimented a lot with alternative materials such as bioplastics and composites.

Designed at Academy of Fine Arts in Gdansk.
