

Project Title: Crafting Intangibles

Hosted By: Anuvad Innovation Studio

Project Introduction:

Crafting Intangibles presents an ecological approach to building functional, simple, and aesthetically beautiful interactive textiles. The project is a fabric-digital music synthesiser, and the visitors can interact with and feel its texture and co-create music.

About Organisation:

Anuvad Innovation Studio was started in 2016 and is an award-winning studio with a keen interest in defying the perception of textile based technology as we know it. Anuvad looks at novel ways of integrating technology in the fabric that lead to a multitude of outcomes including experiences and tangible products. Anuvad works with Indigenous communities in remote villages of India to ideate, design, prototype and produce technological products.
